Global Perspectives in Social Work	SW 606	30 hours	10
- Cross-Cultural Competence	-	10 hours	-
- International Social Work	-	10 hours	-
- Humanitarian Aid and Development	-	10 hours	-

(B) How Artificial Intelligence (AI) Can Be Applied in This Course:

1. Case Management and AI Tools:

- Integrating AI tools for case management, facilitating data analysis, and improving decision-making in social work interventions.

2. Predictive Analytics for Social Services:

- Utilizing AI-driven predictive analytics to identify potential social issues, forecast trends, and enhance proactive social service planning.

3. Virtual Counseling Platforms:

- Implementing AI-powered virtual counseling platforms for accessible and personalized mental health support.

4. Data-Driven Advocacy:

- Utilizing AI in analyzing social data to support evidence-based advocacy, influencing policy changes and promoting social justice.

5. Ethical Decision Support:

- Implementing AI models for ethical decision support in complex social work scenarios, considering diverse perspectives and ethical considerations.

6. Global Collaboration and AI:

- Leveraging AI for global collaboration in social work, facilitating cross-cultural communication, and addressing international social issues through technological solutions.

By incorporating AI into the Social Work & Entrepreneurship course, students can explore innovative ways to enhance the effectiveness and reach of social work interventions while considering the ethical implications of using technology in the field.
