(C) How Artificial Intelligence (AI) Can Be Applied in This Course:

Artificial Intelligence (AI) can significantly enhance the Master's Degree Course in International Relations and Negotiation:

1. Data Analysis and Decision Support:

- Using AI algorithms to analyze historical data in international relations, aiding decision-making in diplomacy and negotiation.

2. Simulation and Prediction Models:

- Implementing AI-driven simulations for negotiation scenarios and predictive models to forecast potential outcomes.

3. NLP for Diplomatic Communication:

- Integrating Natural Language Processing (NLP) tools to analyze diplomatic texts, improving communication skills.

4. Predictive Analytics for Global Governance:

- Applying AI-powered predictive analytics to assess global governance trends and challenges.

By incorporating AI, the course can provide students with practical skills and insights into the application of advanced technologies in the field of international relations and negotiation.
